DELL Wide-Screen HD Single Monitor Solutions DELL ULTRASHARP 2408WFP 24-inch Widescreen Flat Panel Monitor with Height Adjustable Stand

\$599.00 Dell Part# : 320-6272

DELL UltraSharp 3007WFP-HC

- **24-Inch WUXGA 1920 x 1200 Display** – View approximately 30%¹ more on-screen content compared to Dell 20-inch monitor.
- **6 Millisecond Response Time (typical)** – Reduces ghosting and imaging associated with movement for fluid motion.
- **3000:1 Dynamic Contrast Ratio** – Get dark blacks, sharp images, crisp text, brilliant color saturation and greater life-like detail.
- **110%² Color Gamut (CIE 1976)** - With Dell TrueColor Technology, you'll see more color than average monitor of 72% color gamut.
- **Full HD 1080p** – Supports higher definition than HD television and a wide array of HD connection options like HDMI, Display Port, DVI-D with HDCP and HDMI 2.1 Audio Out

30-inch Widescreen Flat Panel LCD Monitor

\$1299.00 Dell Part# : 222-717

The Dell UltraSharp™ 3007WFP-HC now features TrueColor – vivid hues, remarkable depth and pictures bright enough for viewing under most lighting. With deeper reds, crisper blues and sparkling whites, you'll observe graphics in their most natural state – on a Dell widescreen with vibrant colors. Lifelike, captivating hues translate into a rich overall entertainment experience.

To fully utilize your new 3007WFP-HC monitor and enjoy the ultra-high resolution settings, your PC must have a dual-link DVI-D graphics card that supports

2560x1600 resolution. These dedicated high-end video cards are offered with select XPS desktops and Dell Precision workstations, or separately through the Dell.com Electronics & Accessories store. A high-quality video card is necessary for you to take advantage of all the 30-inch monitor's features, including high-definition viewing. Please make sure that your PC either has or can support a dual-link DVI-D graphics card before purchasing this monitor.
