Learn from the experts — QuoteSoft TEC sessions are taught by the best in our industry. Attend sessions that are directly related to the job you do and you'll learn from real-world case studies of success.

Get inspired to produce better work — Be exposed to new ways of thinking about your projects and see some of the fastest methods and most accurate workflows out there.

Become more productive — You'll get training to learn new tools, techniques and product features that streamline your workflows and allow you to work more quickly and efficiently — saving time and money.

Learn more about the industry — At QuoteSoft TEC we'll be exploring ideas around how BIM and input automation is changing the game, and how your company can benefit from this workflow.

Learn from your colleagues — QuoteSoft TEC attendees come from companies (small and large) from all over North America. You'll be able to exchange ideas and get solutions to the challenges your company is facing.
